A Checklist for Adjusting Your Brewery for Phase II in Massachusetts

BY KATHERINE GARRAHAN • JUNE 5, 2020

On Tuesday, June 9, 2020 at 3pm EST, join us for a live discussion regarding this checklist for changes in use. For more information, [please contact Jennifer Irvine](#).

The below is a general checklist of questions and issues you should review while contemplating any changes of use, service, expansion to outdoor uses or other departures from your prior operations as a result of COVID-19 restrictions. This is only a general guide to help you understand and think through potential issues and pitfalls. Due to the rapidly changing landscape of laws, regulations, and executive orders at both the state and local levels, as well as the unique circumstances of each individual business, this cannot cover every conceivable contingency.

As you contemplate the necessary changes to your business and service operations, the questions and recommendations below are meant to help guide your thought process concerning how the changes you may be contemplating may be affected by external forces. If you have questions or concerns about how your contemplated changes may be affected by laws, rules or regulations, please consult your attorney.
